Our Mission Statement

Our mission is to provide quality mechanical solutions through innovative design & fabrication services and enhancements of customer productivity with systems and industrial service solutions. We are committed to being a leader in our industries by meeting or exceeding contract requirements, employing quality-minded people and following proven practices. Our goals will always be superior customer service, innovation, quality, and commitment.

About FABTEC, Inc.:

FABTEC, Inc. was established in November of 1999 by Sandra and Edward "Hap" Balmes. It started as an on-the-road industrial mechanical fabrication and installation service company. Now, through sixteen years of serving the industrial world, we have evolved into a fully equipped industrial mechanical services company, who provides mechanical services and custom design fabrication to the energy and industrial sectors. We have been an A+ member of the BBB since 2008. We offer our customers the highest quality in industrial mechanical services, design & fabrication services and turn-key projects. We have added a water jet to our line of equipment, which allows us to increase production of quality precision cutting on virtually any material, excluding tempered glass.

Our number one goal is 100% customer satisfaction from beginning to end of every project.

"Let us be your all-American one-stop shop!"

Sandra & Hap Balmes
President / Vice President

WE ARE MSHA CERTIFIED!

MECHANICAL SERVICES

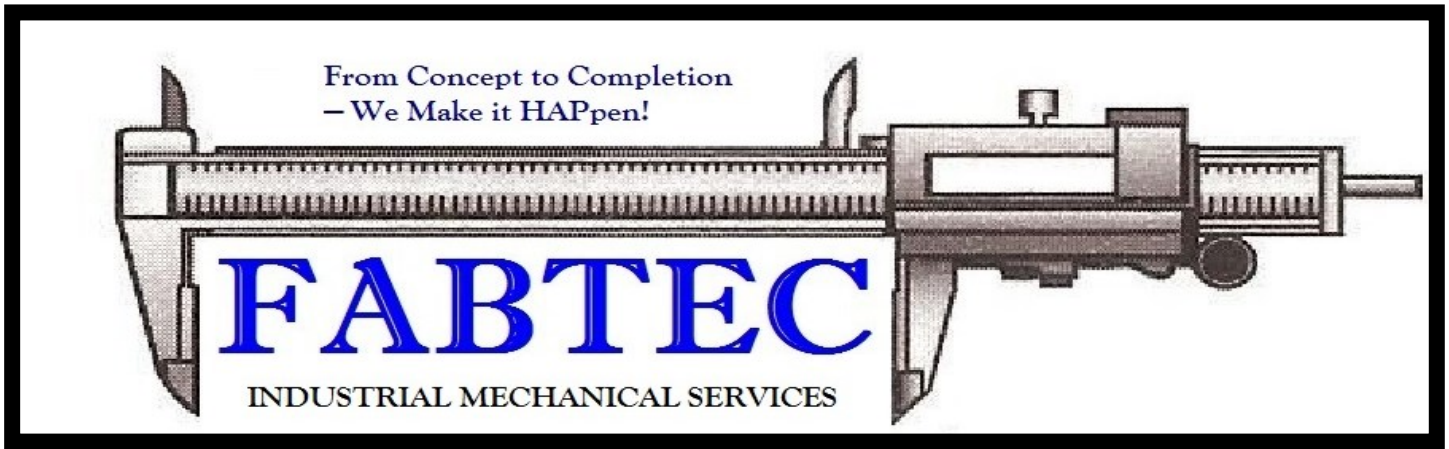

FABTEC, Inc. has more than 90 years collective experience in the mechanical services field for:

- Supplemental Manpower for Power Plant Maintenance
- Health, Safety, Environment Fabrications and Installations
- Preventative Maintenance / Audits
- Equipment Rigging / Tank Installs
- Pump Repairs / Re-piping
- Structural Welding (including platforms, handrails, metal framing, etc..)
- Pipe Welding
- Process piping (including double wall containment and vacuum insulated piping)
- Fabrication & Install of Solar Arrays

We specialize in all Stainless Steel alloy pipe welding, however we are also extremely proficient in the following piping materials:

- Carbon Steel
- PVC
- CPVC
- HDPE
- Double Wall Containment
- VIP—Vacuum Insulated Pipe for Cryogenics
- Sanitary Process Piping
- Duplex

This allows our certified welders to take on any welding job you may need completed. Give us a call at 520-568-2756 today, and we will give you a fast and easy quote for all of your mechanical service needs.

INDUSTRIAL PLANT MAINTENANCE

FABTEC has 25 collective years experience providing maintenance support to the commercial, industrial and energy sectors. Below are some of the maintenance services we provide:

- ◆ SHUTDOWN MAINTENANCE AND REPAIRS
- ◆ ROUTINE PLANT MAINTENANCE & PREVENTATIVE
- ◆ PROCESS AND UTILITY INDUSTRIAL PIPING
- ◆ PLANT ADDITIONS, MODIFICATIONS AND RETROFITS
- ◆ INDUSTRIAL CERTIFIED WELDERS
- ◆ SUPPLEMENTAL MAN POWER

ANNUAL PLANT MAINTENANCE CONTRACTS

With Fabtec's Complete Care, we can drastically reduce your plants' maintenance problems with our Annual Maintenance Contracts. Customers who opt for our annual maintenance solutions are offered priority service and rates. With a dedicated maintenance team at your disposal, we will analyze your facility maintenance needs throughout the year, on an agreed upon schedule and we will complete all necessary repairs to ensure minimal shut down time. This saves our customers immensely in time and money, all year-round.

We are experts at handling the various requirements of our customers, by rendering unparalleled annual maintenance contract services. All of our services are rendered by expert professionals who possess in-depth knowledge in maintaining commercial, industrial and energy plants. Owing to this, our services are widely appreciated by our clients for their flexibility, reliability, personalized approach and timely execution. On top of our expertise, all of our services strictly comply with the international quality norms & standards.

INDUSTRIAL SERVICES

CUSTOM FABRICATION CAPABILITIES

With a fully equipped machine shop, as well as a mobile shop, we will design and build any custom mechanical, safety, and material handling fabrications, when and where you need them. We have fully equipped welding trailers as well as highly skilled ASMW certified welders for all Stainless Steel, Aluminum, and Mild Steel alloy pipe and plate to meet your welding and fabrication needs.

Fabrication Capabilities

Punching
Breaking
Milling

Shearing
Rolling
Turning

Tube Bending
Water Jet Cutting
Welding

GENERAL RIGGING / INSTALLATION CAPABILITIES

We are equipped to handle all of your installation needs. Since we provide custom fabrication services along with our industrial services, we can make any unexpected field modifications that you may need completed.

Common Installation Jobs

- √ Replacing Equipment / Staging of Equipment
- √ Equipment Layout
- √ Custom Modifications
- √ Equipment Tie-In
- √ Field Modifications
- √ Equipment Install / Leveling
- √ Red Line CAD Drawing
- √ Custom Fabrications
- √ Pre-Assembled Piping
- √ Sanitary Process Piping
- √ Vacuum Insulated Piping
- √ Demolition of Equipment

We are proud to introduce our **Flow Certified Water Jet!**

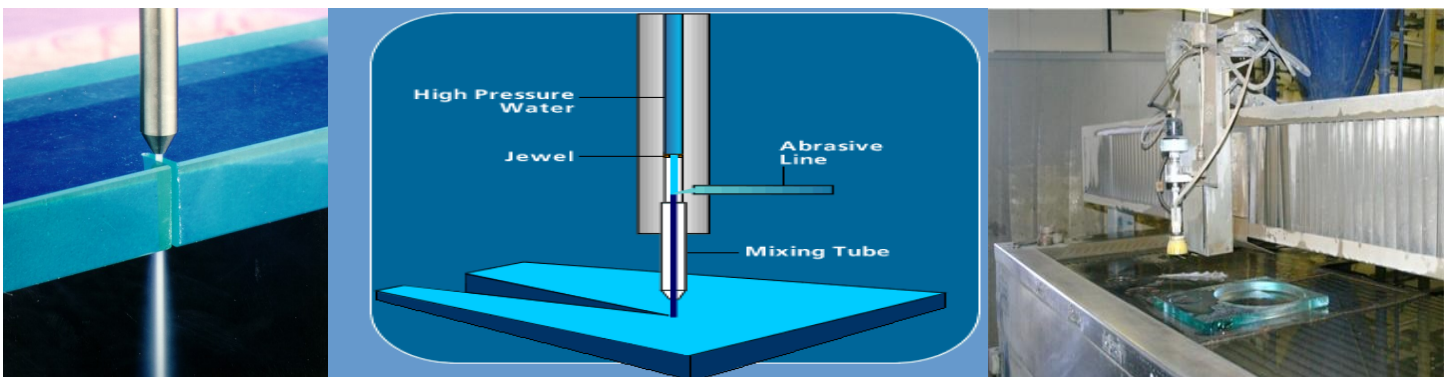

With this cutting-edge technology we are able to greatly increase our productivity for cutting both simple and complex parts.

This **significantly** lowers the cost for producing these parts, which allows us to pass these savings on to you, our customer.

Our water jet can cut through a wide range of materials, including:

- ⇒ **Glass (excluding tempered glass)**
- ⇒ **Wood**
- ⇒ **Stone**
- ⇒ **All Metals (Carbon Steel, Stainless Steel, Aluminum, etc.)**
- ⇒ **Manmade Composites**

Our machine is capable of cutting a part within an extremely tight tolerance, producing a clean edge with no burrs. We can water jet any of the above mentioned materials with thicknesses 8" - 10", depending on the material, with absolutely no distortion.
